Live portal https://crew.tinobritty.me/jobs: HireKiwi QA Engineer assessment

Date found	13 October 2026
Environment	Live portal, Chrome on desktop, signed in. Read-only: nothing was submitted or changed.
Source	Failed manual cases in 1_Manual_Test_Cases

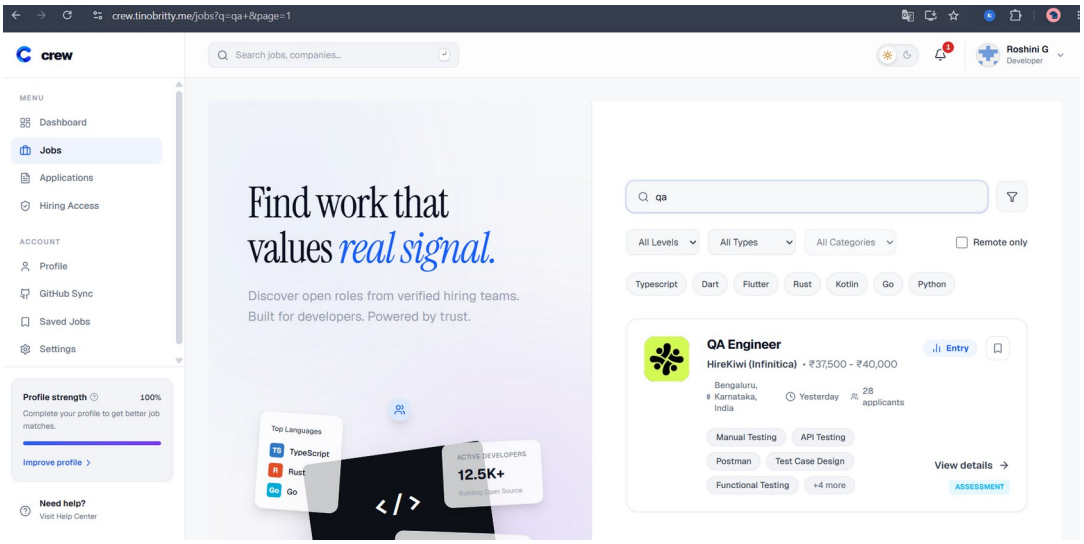

Summary

ID	Title	Severity	Priority	Test case
BUG-01	Salary on the card has no pay period	Major	High	LST-01
BUG-02	Job without a salary shows no label	Minor	Low	LST-02
BUG-03	Search handles extra spaces inconsistently	Minor	Medium	LST-06
BUG-04	Selected filter is lost after pressing Back	Major	High	LST-07
BUG-05	Filter button beside the search box does nothing	Major	High	LST-15
BUG-06	Invalid page and type values in the URL behave inconsistently	Minor	Low	LST-09
BUG-07	Empty area of a job card is not clickable	Minor	Low	LST-10
BUG-08	Card and detail page show different posted dates	Minor	Medium	LST-19

Severity: Major means a key function or key information is wrong or unusable. Minor means a small defect with an easy workaround. Priority is how soon it should be fixed.

BUG-01 Salary on the card has no pay period

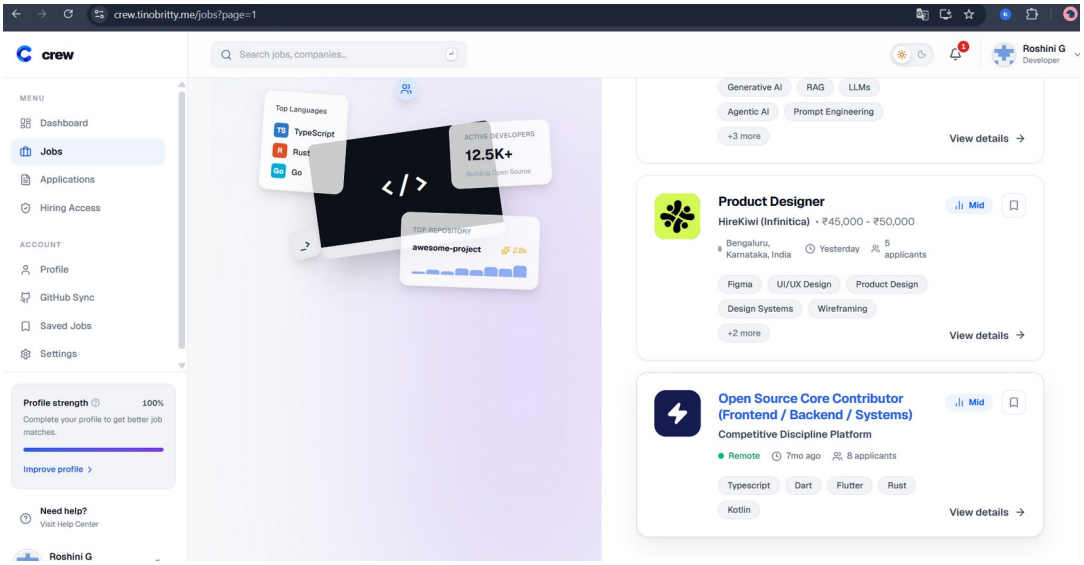

Severity / Priority	Major / High
Test case	LST-01
Preconditions	Live portal reachable at https://crew.tinobritty.me/jobs.
Steps to reproduce	1. Open /jobs. 2. Find the QA Engineer card. 3. Read the salary shown on the card.
Expected result	The salary states its period, for example "per month" or "per year".
Actual result	The card shows "₹37,500 - ₹40,000" with no period. It can only be guessed as monthly (x12 = ₹4.5 to 4.8 lakh a year). A reader could take it as a yearly salary.
Evidence	ev8-qa-one-space.png (QA Engineer card)

QA Engineer card with a salary and no pay period

BUG-02 Job without a salary shows no label

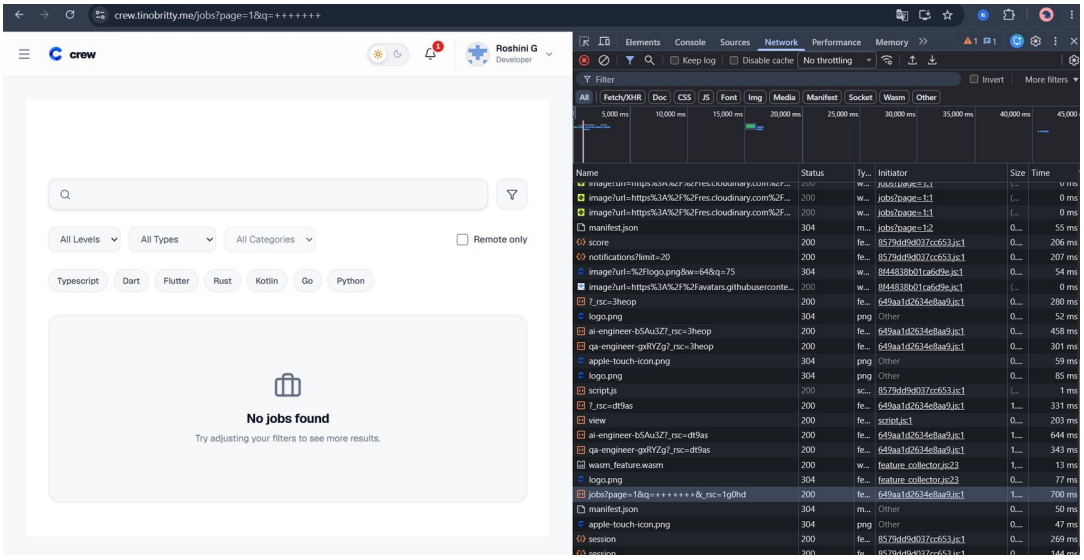

Severity / Priority	Minor / Low
Test case	LST-02
Preconditions	Live portal reachable at https://crew.tinobritty.me/jobs.
Steps to reproduce	1. Open /jobs. 2. Find the Open Source Core Contributor card. 3. Look for a salary line.
Expected result	A label such as "Not disclosed" appears where the salary would be.
Actual result	No salary line and no label. The card looks incomplete next to the others.
Evidence	ev9-open-source-no-salary.png

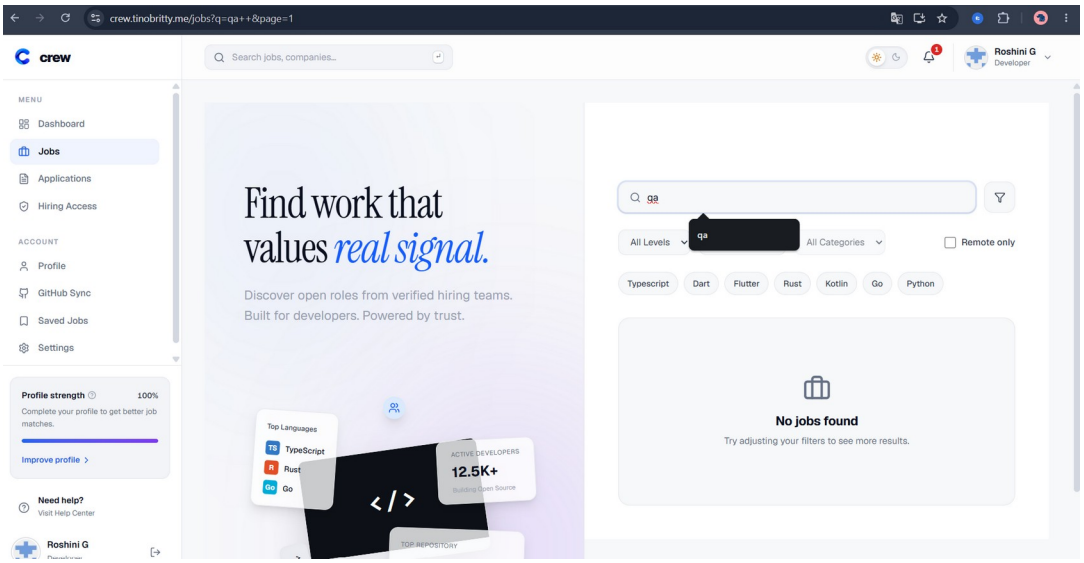

Open Source Core Contributor card with no salary line

BUG-03 Search handles extra spaces inconsistently

Severity / Priority	Minor / Medium
Test case	LST-06
Preconditions	Live portal reachable at https://crew.tinobritty.me/jobs.
Steps to reproduce	1. Open /jobs. 2. Press the spacebar 7 times in the search box and press Enter. 3. Search "qa" followed by one space. 4. Search "qa" followed by two spaces.
Expected result	Spaces are trimmed. A spaces-only search lists all jobs. Both "qa" searches list QA Engineer.
Actual result	Spaces only: "No jobs found". One trailing space: QA Engineer is listed. Two trailing spaces: "No jobs found". The result depends on the number of spaces.
Evidence	ev4-spaces-only-search.png, ev7-qa-two-spaces.png, ev8-qa-one-space.png

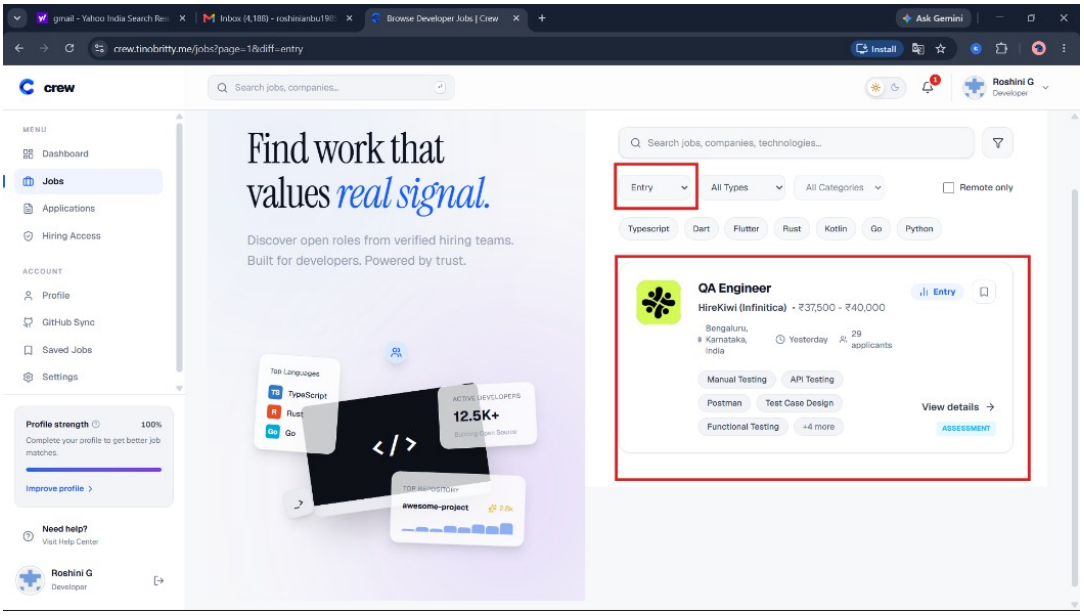

Spaces-only search shows "No jobs found"

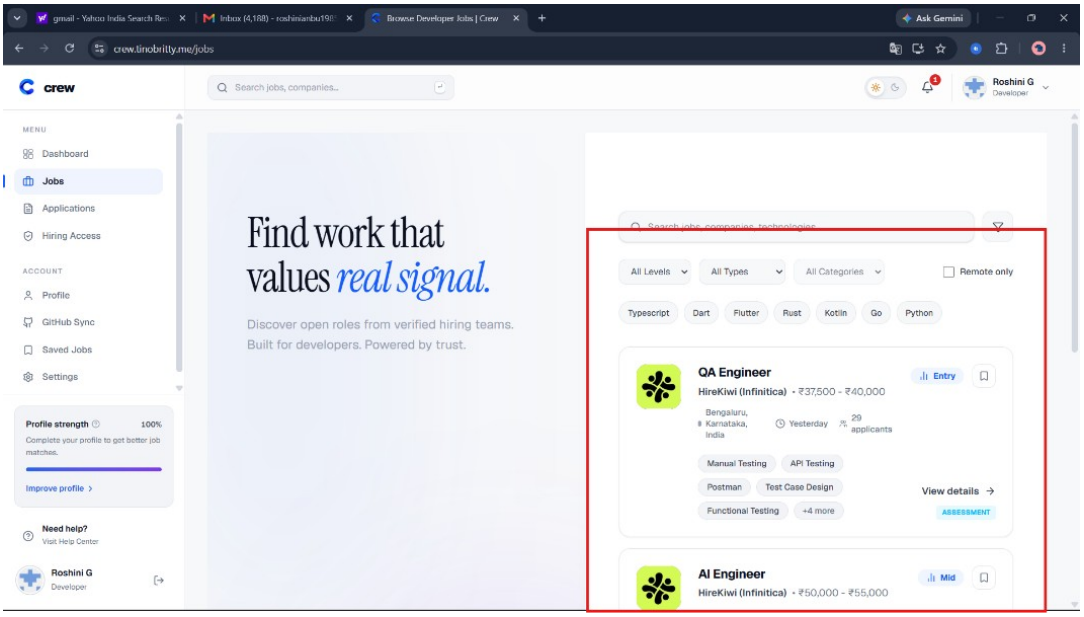

"qa" plus two spaces shows "No jobs found"

BUG-04 Selected filter is lost after pressing Back

Severity / Priority	Major / High
Test case	LST-07
Preconditions	Live portal reachable at https://crew.tinobritty.me/jobs.
Steps to reproduce	1. Open /jobs. 2. Select the Entry level filter. 3. Open the QA Engineer job. 4. Press the browser Back button.
Expected result	The list returns with the Entry filter still selected.
Actual result	The Entry filter is reset, so the candidate has to choose it again.
Evidence	ev10-lst07-entry-filter-applied.png, ev11-lst07-filter-reset-after-back.png

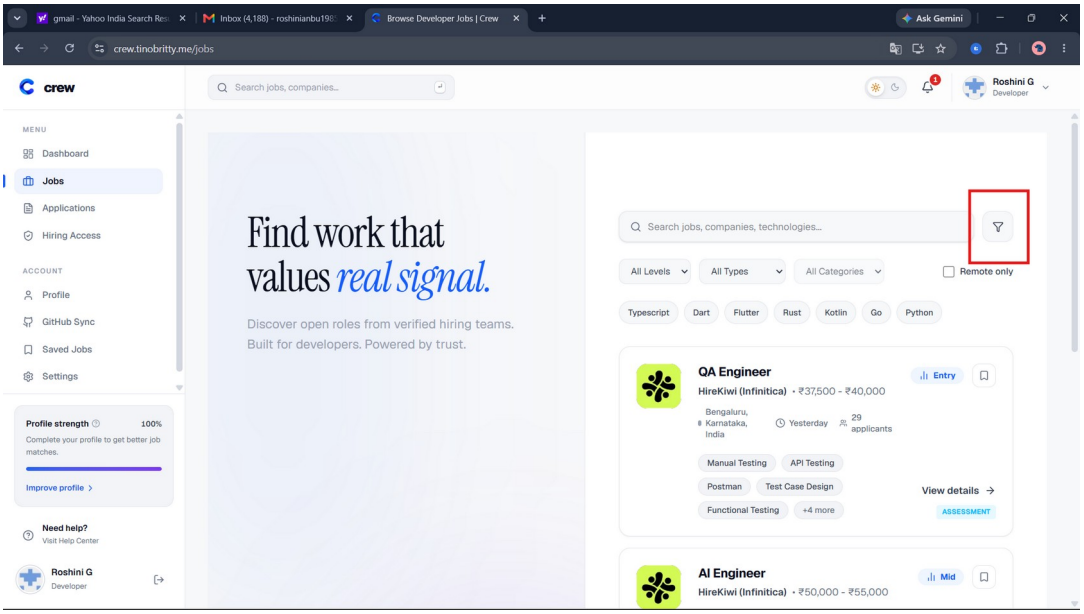

Entry filter applied before opening the job

After Back: the filter shows "All Levels" again

BUG-05 Filter button beside the search box does nothing

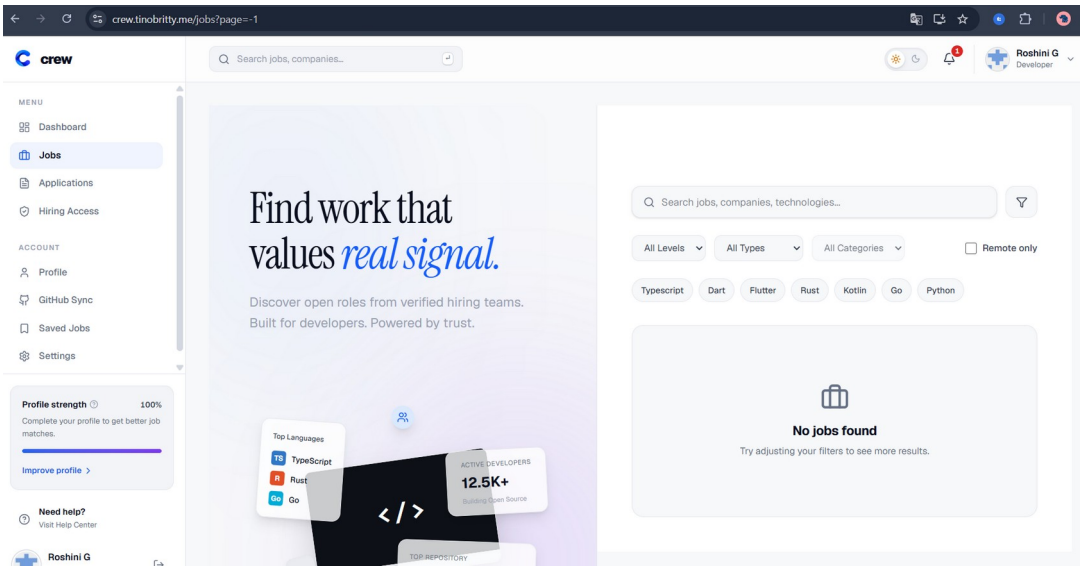

Severity / Priority	Major / High
Test case	LST-15
Preconditions	Live portal reachable at https://crew.tinobritty.me/jobs.
Steps to reproduce	1. Open the job listings page. 2. Click the funnel-shaped filter button beside the search box. 3. Watch for a panel, menu or extra options.
Expected result	A filter panel or menu opens with filtering controls that can be used and closed.
Actual result	Nothing opens. The button gives no response.
Evidence	ev12-lst15-filter-button.png (the filter button is marked in red)

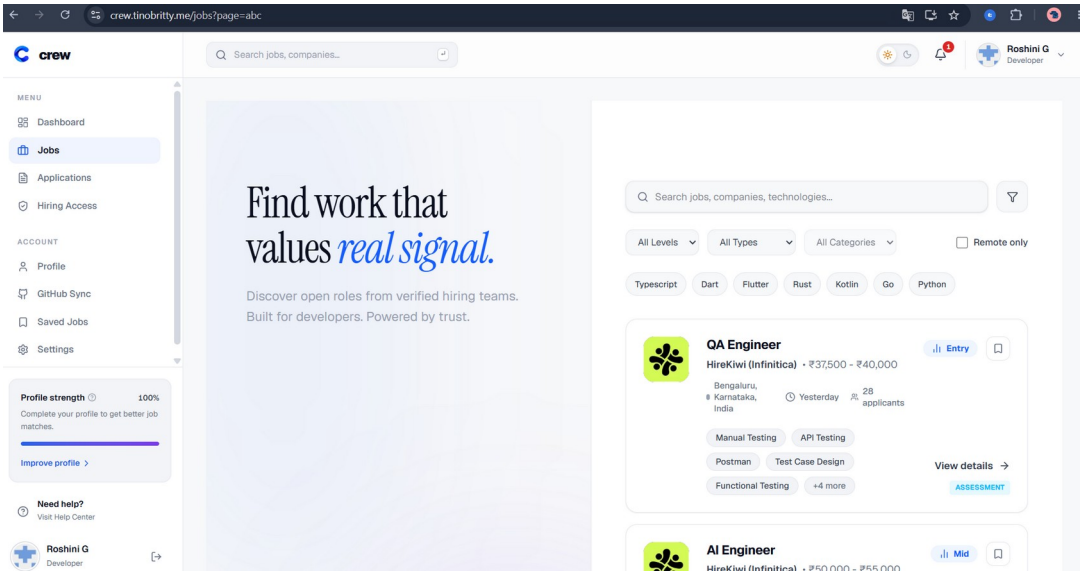

The filter button beside the search box (marked); clicking it opens nothing

BUG-06 Invalid page and type values in the URL behave inconsistently

Severity / Priority	Minor / Low
Test case	LST-09
Preconditions	Live portal reachable at https://crew.tinobritty.me/jobs.
Steps to reproduce	1. Open /jobs?page=0, then /jobs?page=abc, then /jobs?page=-1. 2. Open /jobs?type=abc.
Expected result	Invalid values fall back to a default or are explained, in the same way for all of them.
Actual result	page=0 and page=abc show jobs. page=-1 shows "No jobs found". type=abc shows 0 jobs while the dropdown still reads "All Types", so the page contradicts itself.
Evidence	ev5-page-minus1.png, ev6-page-abc.png, ev2-diff-mid-type-abc.png

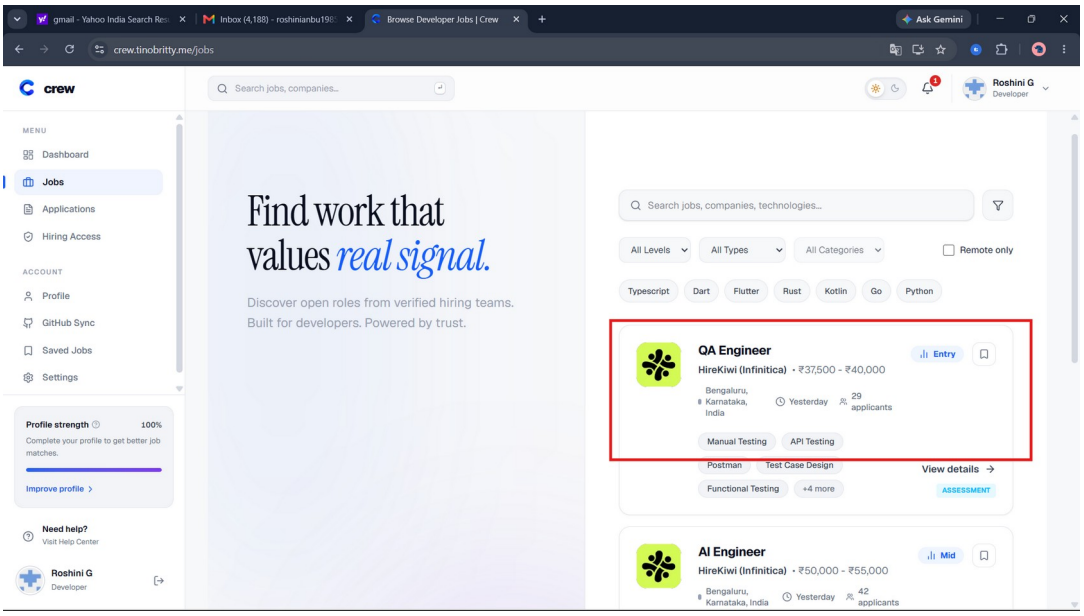

page=-1 shows "No jobs found"

page=abc shows jobs

BUG-07 Empty area of a job card is not clickable

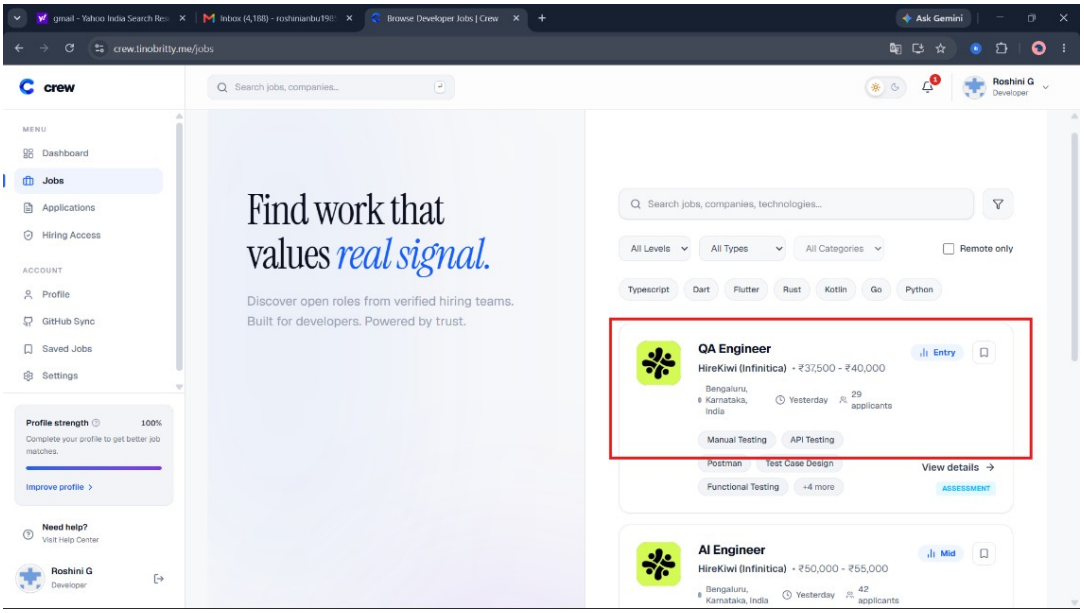

Severity / Priority	Minor / Low
Test case	LST-10
Preconditions	Live portal reachable at https://crew.tinobritty.me/jobs.
Steps to reproduce	1. Open /jobs. 2. Click the empty area inside a job card, away from the title and the View details button.
Expected result	The job opens, or the page makes clear that only the title and button are links.
Actual result	Nothing happens. Only the title and View details open the job.
Evidence	ev13-lst10-card-empty-area.png (the empty card area is marked in red)

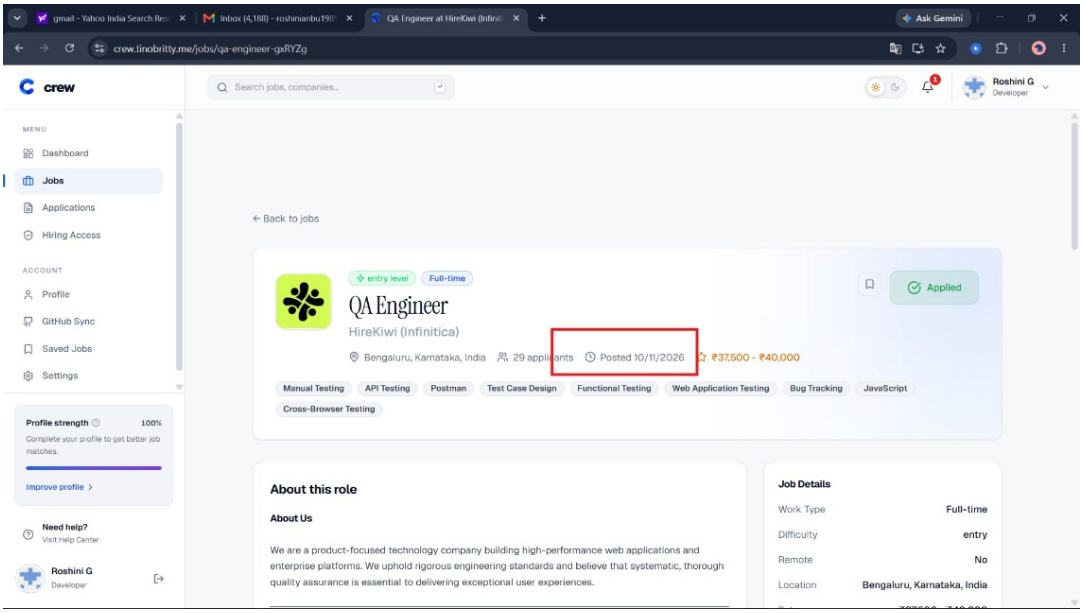

The marked empty area of the card does not respond to a click

BUG-08 Card and detail page show different posted dates

Severity / Priority	Minor / Medium
Test case	LST-19
Preconditions	Live portal reachable at https://crew.tinobritty.me/jobs.
Steps to reproduce	1. Open /jobs and note the posted time and applicant count on the QA Engineer card. 2. Open the detail page straight away. 3. Compare the posted date.
Expected result	Both pages show the same date, in a format that is clear for Indian users, for example 12 Oct 2026.
Actual result	The card says "Yesterday" (12/10/2026), but the detail page says "Posted 10/11/2026", which is 11 October 2026 in MM/DD/YYYY format. The two dates do not match and the format is easy to misread as 10 November.
Evidence	ev14-lst19-card-yesterday.png, ev15-lst19-detail-posted-date.png

Card: posted "Yesterday"

Detail page: "Posted 10/11/2026"
